

Dragons At the Doors of Centers

Rinpoche recently commented that it would be good for centers to place dragons (forceful or strong ones) at the door of the centers. This gives strength to the center.

They can be placed on either side of the door or above the door. Often there is a jewel that is between the 2 dragons.

The main point is that it is important how the dragons appear – the dragons need to be in good shape, forceful and strong.

Rinpoche said these dragons can be different sizes depending on the size of door and so on.

The [Foundation Store](#) has a small stock of dragons, and it may be possible to buy good forceful dragons in Nepal.
